Senior Python Backend Engineer

PROFESSIONAL SUMMARY

Passionate and results-driven Senior Python Engineer with 6+ years of experience architecting high-throughput distributed backend services, asynchronous pipelines, and RESTful APIs. Specialized in FastAPI, Django, Celery, and PostgreSQL with a proven track record of processing millions of daily transactions in HR Tech and enterprise automation.

TECHNICAL SKILLS

Python (AsyncIO, Typing), FastAPI, Django REST Framework, Celery, RabbitMQ, Redis, PostgreSQL, SQLAlchemy, Docker, Kubernetes, AWS (EC2, S3, RDS), Git, PyTest, Microservices Architecture, ATS & Payroll Data Pipelines.

PROFESSIONAL EXPERIENCE

Lead Python Developer | TechFlow Systems, Hyderabad (2022 - Present)

- Architected and deployed high-concurrency FastAPI microservices handling 5M+ daily API requests with <30ms average latency.
- Designed asynchronous Celery task pipelines with Redis broker for real-time employee attendance and payroll calculations.
- Reduced PostgreSQL query execution time by 62% through optimized indexing, table partitioning, and connection pooling.
- Mentored a team of 6 backend developers and established strict code review and PyTest CI/CD standards.

Senior Backend Engineer | CloudScale HR Solutions, Hyderabad (2019 - 2022)

- Built core Applicant Tracking System (ATS) backend modules using Django and PostgreSQL.
- Integrated multi-format resume parsing and candidate ranking pipelines processing 10,000+ monthly applications.
- Deployed containerized services on AWS ECS using Docker and Terraform with automated Prometheus observability.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science & Engineering | IIT Hyderabad (2015 - 2019) | GPA: 8.8/10
