Senior Data & Backend Automation Engineer

PROFESSIONAL SUMMARY

Data-oriented Backend Engineer with 5 years of experience in Python automation, ETL pipeline architecture, and high-volume data handling. Expert in building scalable data processing engines with Airflow, Celery, FastAPI, and complex SQL databases.

TECHNICAL SKILLS

Python, FastAPI, Apache Airflow, Celery, Pandas, PySpark, PostgreSQL, MongoDB, Redis, Apache Kafka, Docker, AWS S3/Redshift, CI/CD Automation, Data Warehousing, High Throughput Pipelines.

PROFESSIONAL EXPERIENCE

Senior Data Platform Engineer | NexaCorp India, Hyderabad (2021 - Present)

- Engineered fault-tolerant distributed data pipelines using Python and Celery processing over 20M daily user log events.
- Built internal automation APIs using FastAPI to feed cleaned data directly into analytics and machine learning models.
- Managed high-performance PostgreSQL clusters and implemented automated data deduplication and validation crons.

Python Backend Developer | FinTrack Analytics, Hyderabad (2019 - 2021)

- Developed automated backend services using Python and Flask for financial transaction processing.
- Designed automated reporting tools and integrated third-party REST APIs with robust retry mechanisms.

EDUCATION & CERTIFICATIONS

B.E. in Information Technology | Osmania University, Hyderabad (2015 - 2019) | Distinction
